## NSE Pre-Open-Market-Stock Data Analysis 07-Jan-2025

### About Dataset

This dataset provides a snapshot of stock performance during the pre-opening session of the NSE. It includes data for 1,875 stocks with 11 key metrics such as previous close price, indicative equilibrium price (IEP), percentage change, final opening price, traded volume, and market capitalization.

#### Note

- During Order collection phase Price, Quantity and Value are "Indicative" in nature.
- Final values under Price, Quantity and Value are displayed after the Pre-Open Market Order Collection is closed.
- For more information on Pre-Open Market refer to our [FAQs](#)
- In case, any of the index constituent undergo a scheme of arrangement (e.g. demerger), such stock will not be displayed under 'Market Watch - Equity/ Stock' section during Special Pre-Open session and it will be displayed post resumption of trading of such stock under 'Normal' market.
- Index value is calculated based on previous closing price of Demerging stock. [Click here](#) to view the list of index constituents.
- Data is displayed for securities where orders have been received during the pre-open session.
